DETAILED ACTION

Claims 1-58 have been examined.

Claim Rejections - 35 USC §101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefore, subject to the conditions and requirements of this title.

Claims 1,14,26-32,43 and 53-58 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. In claim 1 the applicant claims a transaction method in which a first party transfers a first part of a payment token to a second party to obtain the subject of a transaction, the first party transfers a second part of the payment token to a third party, the first party issues a notification that the subject has been received, and the third party, subsequent to receiving notification that the first party has received the subject, releases the second part of the payment token to the second party to allow payment to the second party. This process might be performed without the aid of any technology and therefore the claimed method is not within the technological arts.

In claims 14,26-32,43 and 53-58 the applicant claims a transaction method, similar in scope to claim 1.

All that is necessary to make a sequence of operational steps in a statutory process within 35 U.S.C. 101 is that it be in the technological arts so as to be in concordance with the Constitutional purpose to promote the progress of "useful arts" *In re Musgrave*, 431 F.2d 882 167 USPQ 280 (CCPA 1970)

A claim is limited to a practical application when the method, as claimed, produces a concrete, tangible and useful result: i.e. the method recites a step or act of producing something that is concrete, tangible and useful. *See AT&T v. Excel Communications Inc.*, 172 F3d at 1358, 50 USPQ2d at 1452.

Claims 2-23,15-2533-42 and 44-52 are dependant upon the above rejected claims and are rejected for at least the same reasons.
